This Company reduces by the contract, the first and all subsequent premiums from 20 to 30 per cent as compared with those of Mutual Companies.
During the last three years the premium receipts of the Company have aggregated \$1,700,000. Had it charged the high premiums of Mutual Companies the same amount of insurance would have cost the policy-holders about \$2,250,000. The National has, therefore, in three years, made a dividend IN ADVANCE of \$550,000. In other words, its policy-holders have retained in their own pockets \$550,000, which would have been successfully exacted from them by Mutual Companies.
